Wednesday, 03 August 2011 16:03 - Last Updated Sunday, 07 August 2011 12:12

Blood transfusions are well understood to be needed in any cardiac surgery service. Blood transfusions are also well understood to be undesirable and very expensive.

Reducing the need for transfusions is paramount to the long term health of both the patients that we serve and the hospital's budgets. ([The effects of blood transfusions: managing patients needs and hospitals economics](#))

Perfusion International is dedicated to helping hospital's reduce their dependence on transfusions thereby, improving patient outcomes and saving significant dollars.

Please [contact](#) us for more information about how Perfusion International can help you set up a blood management program in your hospital.
